GTlandscapesolutions.com

DOES HELP ONLY SHOW UP WHEN YOU CALL?

THINK ABOUT IT...

ONE CALL TO ONE PROVIDER FOR ALL OF YOUR LANDSCAPE NEEDS.

Think about what you could accomplish with all of the time you would save not having to make multiple phone calls for your exterior property needs. GT understands that your time is valuable. So much so, that we've added an important position to our team of experts, a personal Client Ambassador.

GT's Client Ambassador ensures a seamless and efficient communication stream between our clients and team members. On a monthly basis, your Client Ambassador will:

- Perform quality control assessments.
- Assess potential property hazards.
- Meet with your onsite team or residents to promote active dialogue surrounding your service.
- Provide advance notification of fertilizer and chemical applications.

A detailed report will then be provided to the Property Manager outlining what should be expected from our services every month. This proactive approach minimizes unforeseen hazards, while saving our client's time and frustration. Contact GT today. Starting saving time tomorrow.
